SKILLS

- **Languages:** C, C++, Python, JavaScript, SQL
- **Frameworks/Libraries:** ReactJS, Node.js, Express.js, FastAPI
- **AI/LLM:** Agentic AI, LLM APIs, Prompt Engineering, Tool & Function Calling
- **Databases:** MySQL, MongoDB, Firebase/Firestore
- **DevOps/Tools:** Git, GitHub, Docker, AWS
- **Soft Skills:** Problem-Solving, Adaptability, Analytical Thinking, Continuous Learning

PROJECTS

SkyWorld – SaaS Digital Service Management Platform | [Github](#) | [Live](#)

Feb’26 – May’26

- Built a production-grade SaaS platform for managing app development, web development, and branding services with real-time project tracking, service requests, and payment workflows.
- Developed role-based dashboards for Clients, Developers, and Admins with project assignment, milestone tracking, communication workflows, and progress management features.
- Implemented secure authentication using JWT, OTP verification, Google OAuth, and HTTP-only cookies along with Razorpay payment integration and Cloudinary-based file uploads.
- Strengthened backend security using CSRF protection, rate limiting, input sanitization, account logout mechanisms, and secure request validation practices.
- Designed scalable backend APIs using Node.js, Express.js, and MongoDB, and deployed the platform using Vercel, Render, and MongoDB Atlas for reliable performance.

Tech: React.js, Node.js, Express.js, MongoDB, JWT, Razorpay, Cloudinary, Tailwind CSS, Render, Vercel

Shared Expense Tracker | [Github](#) | [Live](#)

May’25 – Jun’25

- Created a real-time shared expense tracking platform tailored for students living in PGs and apartments, enabling seamless group expense management and transparency.
- Secured user access using Firebase Authentication with role-based authorization, ensuring reliable data protection and controlled access across shared groups.
- Engineered a highly responsive live dashboard using React Hooks, efficient state management, and Firestore real-time listeners to deliver sub-100 ms expense update performance across users.
- Automated settlement logic to accurately calculate “who owes whom”, significantly reducing manual reconciliation effort by 90% and improving overall usability.

Tech: HTML, CSS, JavaScript, React.js, Express.js, Firebase

TRAINING

Agentic AI Application Training – Programming Pathshala

Jun’25 – Aug’25

- The intensive, hands-on training focused on designing, architecting, and building Agentic AI systems using modern LLM frameworks and multi-agent architectures for real-world applications.
- Built and deployed AI-driven applications integrating LLM APIs, backend services, and real-world business logic.
- Gained practical experience in LLM orchestration, autonomous agents, advanced prompt engineering, tool/function calling, memory handling, and workflow automation across diverse AI use cases.
- Strengthened understanding of AI system design, scalability, performance optimization, and production-ready AI application development.

CERTIFICATES

- Building Agentic AI Apps – **Programming Pathshala** | [Link](#) Aug’25
- Privacy and Security in Online Social Media – **NPTEL** | [Link](#) Feb’24
- Python Towards AI/ML – **CSE Pathshala** | [Link](#) Dec’23

ACHIEVEMENT

Solved 300+ Data Structures & Algorithms problems on LeetCode, strengthening problem-solving skills across arrays, strings, recursion, hashing, stacks, queues, trees, and core algorithms. Sep’26

EDUCATION

- **Lovely Professional University** Punjab, India
Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.57** Aug’23 – Present
- **Tiny Tots Sr. Sec. School** Ayodhya, U.P.
Intermediate; **Percentage: 82%** Apr’21 – Mar’22
- **Tiny Tots Sr. Sec. School** Ayodhya, U.P.
Matriculation; **Percentage: 83%** Apr’19 – Mar’20
